

### How to put on your HRB-500?

Place your HRB-500 on your left wrist and adjust the strap to your size so that it is held without causing discomfort.

Please make sure that the battery is fully charged before the first use. When the battery of your HRB-500 is nearly exhausted, a "low battery" message will appear on the screen. At that moment separate the upper strap until you see the two terminals of the USB connector. Connect this USB port to a power outlet such as a 220V-USB or a free USB port on your computer

### 3 How to use your HRB-500

#### Turn ON and OFF

To turn on your HRB-500 press and hold the touch button for a few seconds until the screen lights up.

To turn off your bracelet, go to the main screen. Then press and hold the touch button until a new screen with the ON and OFF options appears. Now press the touch button to move to the OFF option and press again and hold the touch button until the screen turns off.

Your HRB-500 bracelet has a "standby mode" system by which the screen turns off if there is no activity for 5 seconds. However, your HRB-500 bracelet continues to work even if the screen is off.

#### Install the APP

To install the APP "Yoho Sports" on your Android or iOS phone you can search the name of the app on Google Play (Android) or App Store (iOS). You can also download it by scanning the corresponding QR code:

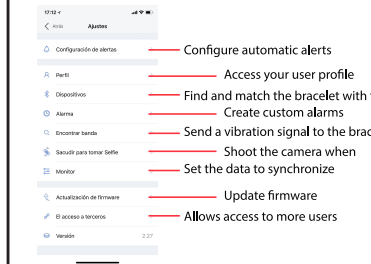

#### How to connect your HRB-500 and your phone?

To connect your wristband to your phone, first activate Bluetooth on your phone. Next open the APP that you have downloaded and installed and click on Settings> Devices. Here all devices will appear within reach. Click on the name of your HRB-500 bracelet. If several devices appeared, you can find out which one is yours by navigating with the touch button of your bracelet until you reach the MAC screen:

To move from one screen to another simply slide your finger from right to left.

#### What notifications do I receive?

Your HRB-500 allows you to receive notifications every time: a call comes in, you receive an SMS message, Facebook, Twitter, Instagram, WhatsApp, if you have been sitting for a long time, if you have not been physically active for a long time. All these notifications can be activated or deactivated from the APP.

#### What functions does the bracelet have?

Press the touch button to move from one screen to the other

#### 4 Troubleshooting

1) I do not receive notifications: If you are an Android user and your wristband is connected, open the Bluetooth options on your phone and allow the transmission of information about calls, messages, etc. If you are an iOS user and your wristband is connected, please restart your phone and your wristband and re-pair via Bluetooth.

2) The APP does not work correctly: The APP has not been developed by SMARTEK, so we are not responsible for its operation. If you discover any anomaly, please contact us to inform us and find a solution.

3) Does the HRB-500 bracelet replace professional medical meters? No. The data reflected on the HRB-500 wristband is calculated using measurement software, giving an indicative result and may not be exact in some cases. To obtain a correct and reliable measurement, please go to your doctor or pharmacy.

4) Can I do water sports with my bracelet? The HRB-500 bracelet has anti-splash and anti-dirt protection, which does not make it ideal for sports such as swimming, diving, snorkeling, surfing, etc.
