# HRB-900

ENGLISH

1 Description

Techinal Specs

Chipset:Telink8266
HD 0.96" color screen
Bluetooth 4.0
IP67
Battery:90mah
Working time:5-10 days
Standby time:about 15 days
Charging time: 2hours

User Manual

smartek

2 App: Jyou

To get the most out of your HRB-900, scan the corresponding QR code to your Smartphone or search the *Jyou* app on the App Store or Google Play. Then download and install the app.
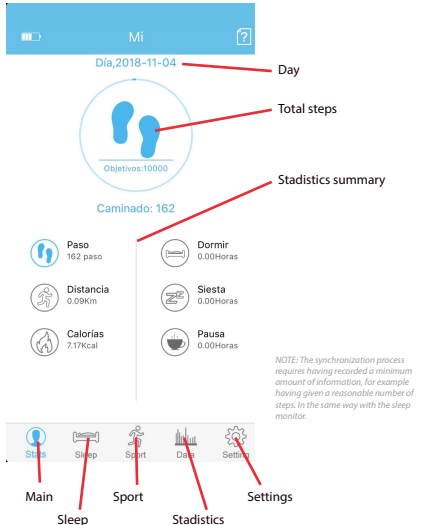

iOS   Android

2.1 Synchronization

After installing the app, activate Bluetooth on your smartphone. Then open the app and click on the Setting icon and then click on Link Device. In the bluetooth devices that appear, click on the one that starts with Y9 and matches the MAC number of your HRB-900 (see section Modes in HRB-900). After synchronization, you can send the data collected on your HRB-900 to your phone for daily tracking.

Sync

2.2 Modes

To change from one mode to another simply click on the menu icons. Some modes have several submenus; To move from one to the other simply slide your finger across the screen.

3 Modes en HRB-900

Click on the screen of your HRB-900 to switch between the different modes available.

368 Main	1574 Steps Pedometer	3.4 KM Distance
379 Kcal Calories	Training Sport	102 BPM Pulsometer
94 58 mmHg Tension	99 %spo2 Oxygen	5 MSG Messages

4. Charge

Please make sure that the battery is fully charged before the first use. When the battery of your HRB-900 is nearly exhausted, a "low battery" message will appear on the screen. At that moment separate the strap until you see the two terminals of the USB connector. Connect this USB port to a power outlet such as a 220V-USB or a free USB port on your computer

5. FAQs

1. I can not synchronize correctly

Please make sure that there is no other device connected via Bluetooth to your phone. If several devices that could be your HRB-900 appear in the Bluetooth search engine, please navigate between the menu screens on your wristband until you find the one that the MAC identifies. This is the name that should appear on your phone and identify a unique HRB-900 device. In some phones the synchronization must be done from the Bluetooth settings of the phone itself and not from the app.

2. It does not synchronize the data

The HRB-900 bracelet has a "margin of error" system to avoid false measurements. Until you have reached a reasonable amount of data the bracelet does not allow you to send the information to your phone.

3. I think the measurement is not correct

Your HRB-900 incorporates a pedometer, calorie counter and other meters that work through software that interprets the data recorded at the time of measurement.

Depending on the physiogomy of each person these measurements may not be completely accurate since your HRB-900 is not a meter for medical purposes. The obtained data are orientative and serve so that each user can have a global vision of their physical state.

4. Do not charge

Please make sure that the charger terminals are touching with the metal plates of the bracelet. Also check that the USB cable of the charger is correctly inserted into a USB port with power. If the problem persists contact us.

5. The app does not work correctly after the last update

Smartek is not the developer of the Jyou app. Our HRB-900 is compatible with the app developed by a third party, so we can not ensure that all the functionalities of the app work correctly all the time. If you have found any kind of problem, please contact us for technical support

6. Activate notifications

You can decide notifications of what applications you want to receive. By default, notifications are disabled; to activate them, please go to Settings > Notifications. Here you can activate or deactivate the notifications that you want to receive.
